Project Title: Kansas City Jazz

I would like to build my microsite on the origins and influence of kansas city style jazz on American music and media. I would like this site to have several pages, discussing the overall timeline of events, general history and important events, the particulars of its style, musc samples, key musicians, and the influence on society both in the past and now. I want this site to be both informational and communicative, where I want to not only describe history, but inspire people to engage more in jazz as a whole.

Home Page/Timeline

- On this page, I want to briefly describe what Kansas City Jazz is in a short summary, with many photos. I don't want to explain too much, but use the homepage as a place to guide to the other pages instead.

Timeline

- In the timeline, I would mainly show a single page scroll that illustrates the general timeline of it, with important and key events/dates.

Musicians

- Here I want to focus on specific musicians that are key to this musical movement, such as Count Basie, Charlie Parker, Lester Young, etc. I want to include bios of the musicians, their impact to the movement, and snippets of their music embedded from spotify.

Kansas City Jazz: Past and Present

- Here I want to talk about this impact the music has on today's society, and comparing it with its influence in the past as well.
